

W@M Portal

Effective management of your installed base throughout your asset's life cycle

Benefits:

- Pre-filled asset information for Endress+Hauser devices because of online connection to Endress+Hauser's product database
- Minimized plant downtime and errors thanks to quick access to asset information around-the-clock
- Information and documentation for installation and replacement
- Evidence of compliance with event history and certificates
- Data hosting by Endress+Hauser (W@M Portal) or on your local system (W@M Enterprise) according to your requirements of IT safety and guidelines
- Easy integration into existing Computerized Maintenance Management Systems (CMMS) and connection Endress+Hauser's software for plant asset management, like FieldCare.

Field of application: The web-based W@M Portal allows data monitoring of your process, permitting proactive maintenance of your devices. You get fast access to critical information, such as spare parts, product availability and reports. Quick access to the right information speeds up your processes, such as repair or replacement on an instrument or downloading certificates for inspections. Furthermore, the pre-filled data available allows reliable planning of your maintenance events.
