

CCE10

Benefits:

- A complete disinfection measuring point on single panel ready to operate.
- Suitable for all disinfection processes - free chlorine, chlorine dioxide, total chlorine and others
- Easy calibration thanks to sampling tap
- Low flow alarm directly processed by transmitter

Field of application: CCE10 includes all medium-conducting components and connections fully mounted and tested. All you have to do is connect them to the water supply. The water loop already includes a filter, check valve, and sampling tap. This facilitates sampling for DPD-comparison measurement and calibration. CCE10 is your time saver during commissioning and operation.
