**Field of application:** Turbimax CUE26 portable turbidity meter offers grab sample measurement compliant to US EPA 180.1. It allows verification of your online turbidity measurements and control of your processes directly on-site. Operation is simple: fill the cuvette, insert it into the measuring chamber and get an instant reading. In addition, Turbimax CUE26 provides guided calibration according to predefined standards, helping to streamline maintenance.

## Features and specifications

## Turbidity

### Measuring principle

Single beam scattered  
light
