

FXZ520

More information and current pricing:

www.ca.endress.com/FXZ520

Benefits:

- Integration of conventional inputs in remote scanning of the installed base
- Modular extension of Fieldgate FXA520 with 4 to 28 additional channels
- Individual galvanic isolation of all channels
- Voltage drop per channel ≤ 4 V
- Configuration via web pages of Fieldgate FXA520
- Scaling and linearization of analog inputs
- Optional totalizing of digital input signals

Field of application: Fieldgate Input Modules FXZ520 are used together with Fieldgate FXA520 for remote scanning of conventional 4 to 20 mA measuring instruments, binary switches and pulse transmitters. Each Fieldgate Input Module FXZ520 has four galvanically isolated channels of the same type. Up to seven FXZ520s can be operated with a Fieldgate FXA520.
