

W@M Portal

Effective management of your installed base throughout your asset's life cycle

Výhody:

- Web-based tool for easy access to information about your installed devices
- Automatic device documentation, such as original calibration certificates, operating manuals
- Overview of process criticality and risk of maintainability of instruments
- Traceability of calibration, repair and maintenance events
- Open interfaces for easy integration of information into your existing tools

Oblast použití: W@M Portal is Endress+Hauser's online platform (hosted application) for asset information management. It allows the data monitoring of your assets and proactive maintenance. You get fast access to critical information, such as spare parts, product availability and reports.
