

Tankvision Multi Scan NXA83B

Gateway component for Tank Gauging systems

优势:

- Precise inventory informations
- Step-by-step site upgrade
- High system availability
- User access through the entire Network
- Simplified site approval procedures

产品规格参数

- **输入** Modbus RS485; V1; WM550; Tokyo Keiso FW9000; Varec Mark/Space; Saab TRL/2; Enraf BPM; Scientific Instruments; Modbus Ethernet
- **输出** OPC DA; Modbus RS485; Modbus Ethernet

应用领域: Tankvision Multi Scan NXA83B is an Tank Gauging system with completely integrated software for operation via remote access and standard web browser. It scans parameters from tank gauges and performs tank calculations. Tankvision Multi Scan allows legacy protocol management as well as gradual upgrades for more flexibility. Due to its modular structure it is ideally suited for medium size tank farms with only a few tanks, but also for large refineries with hundreds of tanks.

特征和规格

现场总线组件

测量原理
通信接口

现场总线组件

功能

Multi Scan

Acquires data from Field Instruments (up to 250 tanks). The data is provided to the visualization software Tankvision Professional NXA85 or other host systems (PLC und DCS).

输入

Modbus RS485; V1; WM550; Tokyo Keiso FW9000; Varec Mark/Space; Saab TRL/2; Enraf BPM; Scientific Instruments; Modbus Ethernet

输出

OPC DA; Modbus RS485; Modbus Ethernet

输出电压

AC: 100...240 VAC

外形尺寸 (WxHxD)

Rack mounted:

483x176x260 mm

(19x6.93x10.24 in)

Wall mounted:

322x300x110 mm

(12.68x11.81x4.33 in)

设置

Via remote desktop
