

Tank gauging Digital Transmitter TMD1

For remote calibration of a tank

Benefits:

- Calibration and adjustment for transmission output can be done by HHT (handheld terminal) after the installation of the transmitter
- Modules for remote transmission output, temperature A/D conversion, level alarm and output for external instrument operation, etc., are available
- HART temperature sensor can be connected via HART communication
- It can be connected to existing or newly-mounted tank gauges of ours just by installing the modules
