TC65
Explosion-proof thermocouple thermometer

Safe monitoring of process temperatures in challenging applications e.g. in the Oil & Gas industry

Benefits:
- Types of protection for use in hazardous locations: Intrinsic safety (Ex ia), flameproof (Ex d), non-sparking (Ex nA)
- High degree of insert compatibility and design as per DIN 43772
- High degree of flexibility thanks to modular design with standard terminal heads as per DIN EN 50446 and customer-specific immersion lengths
- For plug-in/screw-in with sliding compression fitting

Specs at a glance
- **Accuracy** class 1 acc. to IEC 60584
- **Response time** depending on configuration $t_{50} = 3 \text{ s} \ t_{90} = 7 \text{ s}$
- **Max. process pressure (static)** at $20 \degree C$: 80 bar (1,160 psi)
- **Operating temperature range** Type K: max. 1,100 $\degree C$ (max. 2,012 $\degree F$) Type J: max. 800 $\degree C$ (max. 1,472 $\degree F$)
- **Max. immersion length on request** up to 30,000,00 mm (1.181,10")

Field of application: The robust thermometer is designed for use in demanding and safety relevant applications e.g. in the Chemical, Oil & Gas and Energy industry. An optional head transmitter with all common communication protocols makes the device ready to use with enhanced measurement accuracy and reliability compared to directly wired sensors. The sensor may be used direct contact without thermowell or where the application requires it, spring load inside of a separate thermowell. Flexible configuration possible.
